

Technical Specifications			
Model Number	Capacity	Overall Dimensions (L x W x H)	Vehicle Application
TOR15	1.5 cu yd	108" x 63" x 44"	3/4 & 1 Ton Pick-up Trucks
TOR18	1.8 cu yd	117" x 63" x 44"	3/4 & 1 Ton Pick-up Trucks
TOR25	2.5 cu yd	117" x 63" x 51"	Dump Body or Flatbed Trucks

GIVE US A CALL OR EMAIL US FOR QUOTE.

The one-piece double-walled hopper is built of durable polyurethane for corrosion-free performance, whether using rock salt, calcium chloride, sand or any other type of de-icing material.

Standard top screen breaks up large material chunks for better flow, minimizing the possibility of material jamming as it exits the spreader.

Open poly hopper covers protect the truck bed from material overflow during loading into the bed of the truck when loading.

- Independent motors give you complete control of how much material is delivered and spread pattern
- One motor controls the conveyor for rate of material delivery
- The other controls spinner speed and spread pattern
- Electric motors mean reliable startup, quiet operation and low maintenance
- Industry proven steel pintle chain provides smooth, consistent material flow
- Stainless steel housing provides strength and reliability

Extra large 15" polyurethane spinner disc provides long-lasting corrosion-free performance.

The height of the entire assembly can be adjusted in two different positions, for use on both pickup and flatbed trucks, and can be easily removed for off-season storage.

Molded handles for easy removal.

Center High-Mounted Stop Light (CHMSL) is standard to meet FMVSS requirements

Molded handles and built-in tie-down loops for strapping unit to truck

Chute housing includes molded alternate license plate location

Wiring harness includes an accessory wire for optional work light
