

This customer was looking for the very best trailer on the market. I met him and 2 of his buddies at ATC's factory to give him a tour. We sat down to eat lunch and he explained how he has been driving all over the country to find the very best trailer manufacture. He told us how he had a Hot Rod and an old show muscle car and wanted to haul them both around to car shows behind his Fleetwood coach. He was looking for a lightweight, durable, high quality trailer. I took him through the factory and before I even finished the tour he said that he is in the right place. This is the trailer he wants to order. We got the dimensions of the cars he is hauling and the list of options he wanted and got CAD drawings done. The trailer was build and then custom painted by the same company that paints the Prevost Motorcoachs. After the customer picked up his trailer he brought it by Advantage and was as happy as could be and was all excited for us to get some pictures for the website. I then got out to his house and he polished up the coach and trailer for a nice photo shoot. If you keep your eye out at the Goodguys Car Shows you may very well see this trailer.

The trailer is very lightweight, trails great behind the couch and is very easy to use. An LCD flip down tv and stereo was added under the upper cabinets. There are also lower base cabinets with a strong counter top. Escape door makes loading the cars easy.
