

Western 7'6 MidWeight POWER BAR the POWER BAR runs across the back of the straight blade, providing exceptional torsional strength and rigidity to eliminate blade twisting. HIGH-STRENGTH STEEL BASE CHANNEL The high-strength steel base channel reinforces the MIDWEIGHT straight blade, providing extra support where it's needed most.

STANDARD FEATURES

- Elastomer Trip Stop Pads to cushion tripping action
- UltraMount® System – the simplest snow plow on/off system on the market
- Isolation Module electrical system
