

This was a concert management company that was in need of a mobile office, but everyone they looked at was very cheap and didn't look like it would last. Once the customer saw our solid maple cabinetry that was handcrafted by the Amish craftsmen at ATC he was hooked. This trailer was built very quickly to get to work around the country and has exceeded everyone expectations. This is by no means a cheap trailer, it is a high-end trailer with all high-end components installed in it.
