

This is a 41' gooseneck trailer with 27' of living area up front and a 14' garage in the rear. This is designed to haul motorcycles, ATV's, dirt bikes or just cargo. There is room to sleep up to 4 people with plenty of living room. The large TV and surround sound system make for good entertainment. The Amish handcrafted solid maple cabinetry makes this trailer seem like you are right at home rather than sleeping in a trailer. The frame is all aluminum tube framing, making it as light weight as possible. Please call or email if you have any questions. Just remember that every trailer is customer build and can be configured any way you'd like. Factory tours are always available.
