

Blow-off Nozzle Kit

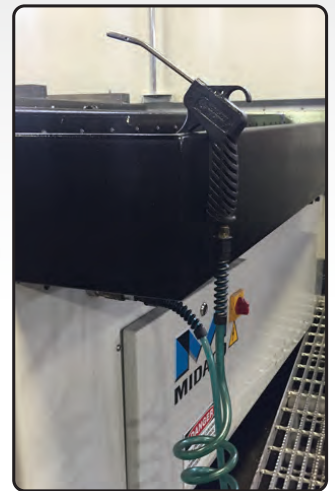

for your Automatic Pallet Changer

Keep the air hose off the floor with a Blow-off Nozzle Kit installed directly onto the Automatic Pallet Changer.

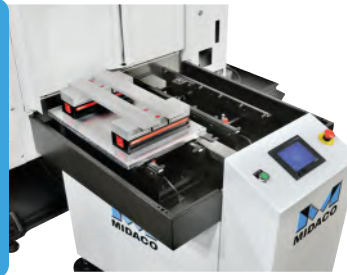

Blow-off Nozzle Kit: ASD25BNK

- Set of two (2) lever-action blow-off nozzles with air-hoses mounted on both the left and right side of the pallet changer.
- Pilot Return Valve, Fittings, Quick Disconnect.
- 1/4" dia. 25' long reinforced coil integrated into the air line of the pallet changer.

Factory installed with a NEW pallet changer or available as a kit, which can be easily installed on an EXISTING pallet changer.

MIDACO has decades of pallet changer experience in all areas of production. Every Midaco product is fully QC tested for 250,000 cycles before being released to market insuring that your system will operate at peak performance for years to come.
